

BAUTEK PU PRIMER

WATER-BASED POLYURETHANE PRIMER

Product Description:

Bautek PU Primer is a specialized water-based polyurethane primer with added fillers and other additives. It's used to stabilize various substrates, as well as improves the adhesion of polyurethane waterproofing coatings.

Fields of Application:

- Surfaces made of concrete, plaster, cement screed, etc., before being coated with a water-based polyurethane waterproofing layer.

Instructions for use:

- The surface must be stable, clean, dry, protected from high humidity, and free of dust, oil, grease, and loose materials.
- Poorly adhering materials and old coatings must be removed, and the surface should be thoroughly cleaned either mechanically or chemically.
- The surface must be flat, smooth, and continuous (i.e., free of voids, cracks, grooves, etc.). Otherwise, they should be properly treated (for example, by applying a suitable filler).
- Bautek PU Primer is applied on the surface using rollers, brushes, or spray machines.
- Environmentally friendly (water-based)

Packing: 5kg/pails

Consumption: 0,1-0,2kg/m².

Product Storage: 2 years, stored in original sealed packing, protected from frost, humidity and exposure to sunlight.
